THE AGE OF ABUNDANCE

We find ourselves today at a unique inflection point. Societal shifts across in demographics, labor, work, purpose and priority are coming to a head. Creative destruction associated with advancements in artificial intelligence will have massive implications on how we as humans spend time and resources, going forward. Yet, robotics and artificial intelligence, together, have the potential to set mankind free. To create a world of surplus, where human time and effort can be applied appropriately, to the things we truly want, and truly need.

The Age of Abundance is upon us. And how do we get there?

- I. THE CLEAN MACHINE.** Machines — AI, robots, rockets and more — will fuel the future, and it must be clean.
- II. RISE OF THE CREATIVE CLASS.** Out of ashes of creative destruction, a new creative class will emerge to lead us all into the future.
- III. GEOGRAPHY MATTERS.** Geographic reality and scarcity across the world will drive unique value in a new economy of abundance.
- IV. A NEW SOCIAL ORDER.** AI will elevate humanity, creating a new social order driving a new form of impact economy.
- V. THE SUPER HUMAN.** These innovations will culminate in a new breed of person, more powerful and capable than ever before.

The combination of these waves will have a manifested result: The Super Human. A member of a class of mankind with the capacity to create, across entrepreneurship, employment and innovation, levered by clean machine intelligence, and organized in clusters across the globe. We will focus our time and attention, investing in focused opportunity and human improvement, thanks to a more evolved social order. We will evolve into — you guessed it! — The Super Human. The Age of Abundance has arrived.

We understand the complex actions and reactions underlying the current economy, allowing for capitalization on long-term waves of value creation over time. We have a unique opportunity today to invest in unique opportunity, and at the same time, manifest a better world. To equip society's economic evolution, enabling financially the pursuit of freedom of expression, all while driving the achievement of the highest collective consciousness, and mankind's evolution into greater.

MANIFESTO

THE AGE OF ABUNDANCE

THE AGE OF ABUNDANCE is an Iris Invest Future Cast. We are manifesting the future. We sit at the cusp of an unprecedented Age of Abundance, where human quality of life and collective consciousness will increase dramatically. Our thesis lays out areas for opportunity, collaboration and investment.

THESIS

THE CLEAN MACHINE

The intelligent automation of our world continues. The required advancements, already occurring, will require a real-world infrastructure across energy, robotics, advanced manufacturing, space and more. These machines must indeed be “clean”, as we strive toward a sustainable and comfortable existence. **Opportunity awaits.**

AI

- SUPER COMPUTERS
- QUANTUM COMPUTERS
- SEMICONDUCTORS
- DATA CENTERS
- FOUNDATION MODELS

ROBOTICS

- HUMANOID ROBOTICS
- VERTICAL ROBOTICS
- MICRO ROBOTICS
- ADV. MANUFACTURING
- MOTORS + ACTUATORS

ENERGY

- RENEWABLE POWER
- GRID INFRASTRUCTURE
- ENERGY STORAGE
- ENERGY EFFICIENCY
- NUCLEAR POWER

SPACE

- ROCKETS
- SATELLITES
- PROPULSION
- ADV. MATERIALS
- FRONTIER ROBOTICS

THESIS

RISE OF THE CREATIVE CLASS

Out of the ashes of Creative Destruction, we see the rise of a new creative class. A new breed of creator who will enjoy innovative, creative and entrepreneurial pursuits once limited to a few. Enter: the entrepreneur hero. An entirely new economy will emerge, fueled by generative AI, fintech and consumer focused tools. **Onward and upward.**

STAY TUNED

THESIS

GEOGRAPHY MATTERS

In a world of abundant creation, geography remains scarce — and hard to ignore. Mother Nature controls, culture drives quality of life, and the social constructs we build dictate how people vote with their feet. Certain types of people cluster in certain places, and the economy arranges accordingly. As entrepreneurship, innovation and intelligence increase in economic importance, competition of place will ensue. **Geography matters.**

STAY TUNED

THESIS

A NEW SOCIAL ORDER

With machine intelligence and labor, humanity will rise in status. The economy will change, completely. People will be valued in different ways, in terms of quality rather than quantity. We will spend adapt the way we spend our time accordingly, and, with the help of artificial intelligence, earn the luxury of focus. We will build in areas of economic viability and impact, supported by an innovation economy driving rapid societal evolution. Public private collaboration and coordination will improve civilization as we know it. **Now, a better way.**

STAY TUNED

The combination of these waves will have a manifested result: The Super Human. A member of a class of mankind with the capacity to create, across entrepreneurship, employment and innovation, levered by clean machine intelligence, and organized in clusters across the globe. We will focus our time and attention, investing in focused opportunity and human improvement, thanks to a more evolved social order. We will evolve into — you guessed it! — The Super Human. **The Age of Abundance has arrived.**

STAY TUNED

THESIS

THE SUPER HUMAN

An aerial, black and white photograph of a winding asphalt road that snakes through a dense, lush forest. The road has white lane markings and two small cars are visible on it. The text 'Let's take the High Road, together.' is overlaid in the top left corner in a large, bold, sans-serif font.

Let's take the High Road, together.

The **HIGH ROAD** is our weekly, where focus on investment, impact and individuation. We share investment opportunity and talk about big ideas.
